What is *pgn4web?*

pgn4web is a full-featured and powerful chess viewer that allows you to view PGN games on Chessgames. Unlike the other PGN viewers, pgn4web does not use Java, making it the ideal choice for platforms that are not able to run Java. It is the default viewer for iPhones, iPads, Androids, and other mobile devices.

How do I watch a game?

The simplest way to view a game is to press the autplay button (the one that looks like a "+"). That will step you through the game at the rate of 2 seconds per half-move. If you prefer a slower or faster rate, simply press a number--for example, if you press "6" then it will pause 6 seconds for each half-move.

If you would rather be in full control, you can press the buttons that look like < and > to move to the previous/next move. (TIP: the *j* and *k* keys on your keyboard will do the same thing, for mouse-free game viewing.)

How do I flip the board, so Black is on the bottom?

Pressing the *f* key on your keyboard will flip the board. There are other shortcut keys which you should know about:

pgn4web hotkeys
_____

j, k	previous move, next move
h, l	start of game, end of game
f	flip board (so Black is on bottom)
a, o	start autoplay, stop autoplay
1, 2, 3 …	change autoplay speed delay
